INGREDIENTS

## BENEFITS

- Removes dirt, pesticides, waxes, and other contaminants
- Highly concentrated formula
- Cleans produce in minutes
- Safe for the whole family
- Environment friendly

## Product Fact Sheet

# SunSmile® Fruit & Vegetable Rinse

## ENJOY CLEANER, BRIGHTER, TASTIER PRODUCE

SunSmile® Fruit & Vegetable Rinse is the natural way to remove dirt, pollutants, pesticides, waxy coatings, and other undesirable residue from your fresh fruits and vegetables. Its ingredients are safe for your family and the environment and gentle enough to use on delicate broccoli heads, field greens, and even herbs, yet strong enough to remove sticky glazes and glue residue. Why not enjoy cleaner, tastier fruits and vegetables in your home?

## PHILOSOPHY OF REGENERATION®

SunSmile® Fruit & Vegetable Rinse is self-manufactured by Sunrider using the most advanced technology to achieve the highest standards of concentration, safety, and effectiveness. Because of superior concentration, just a small amount mixed with water cuts through dirt, wax, and pesticides to thoroughly clean produce. This advanced formula is formulated with edible, biodegradable cleansers, so it's safe for people and the planet.

## INGREDIENT HIGHLIGHTS

Decyl polyglucose is derived from corn. As a surfactant, it lowers the surface tension of products they're added to, helping them to remove dirt, surface toxins, and oils effectively. Surfactants do another important job too. One end of their molecule is attracted to water, while the other end is attracted to dirt and grease. So the surfactant molecules help water to get a hold of grease, break it up, and wash it away.

## FAQS

**Q:** I buy organic produce. Do I still need to wash them?

**A:** In today's polluted environment, SunSmile® Fruit & Vegetable Rinse is a must for every household. Even if you buy organic produce, the handling, packaging, shipping, and in-store display of your fruits and vegetables may introduce a variety of contaminants. Even pre-washed produce might still have dirt residue, bacteria, and chemicals on it.

**Q:** What is the cleansing agent in SunSmile® Fruit & Vegetable Rinse?

**A:** The primary cleansing agent is a biodegradable surfactant derived from corn starch (decyl polyglucose), which is edible and does not contain harmful residues.

## RECOMMENDATION

Mix 1 inner capful of SunSmile® Fruit & Vegetable Rinse in one gallon / 3.75 liters of water. For fruit and vegetables, dip in diluted solution for 1 minute. Pat dry or use straight out of the solution. For waxy coatings, dip fruit and vegetables in diluted solution for 5 minutes and wipe dry.
